

Addendum to UltraScan PRO User's Manual

Description

CMR 3032 provides a medium area view (13-mm/0.50-inch port size) port plate with cover glass.

Installation

Remove the existing port plate and replace it with the CMR 3032 port plate.

Operation

Standardize the instrument for the 0.390-inch (9.906-mm) area view with the CMR 3032 port plate in place. Then proceed with sample measurements using the CMR 3032 port plate.

Note: Absolute values read with the glass port plate in place may not be identical to those read with the regular port plate.
